

The Mount Sinai Performing Provider System (MSPPS) has developed Community Gateway, a state of the art, web-based platform for MSPPS healthcare professionals to seamlessly access innovative applications as a mechanism for clinical transformation.

As the MSPPS works to deliver these valuable tools to contracted partners, this document provides an overview of the features and functionality that may be available to you and your organization.

These applications allow MSPPS partners to connect with other professionals in the network, manage clinical performance, review comprehensive data about patients, and access support and training resources.

The MSPPS Community Gateway is available online at mountsinaipps.org or on your mobile device by downloading the app from the App Store on Apple devices and Google Play on Android devices.

General

Make the most of the Community Gateway by utilizing these built-in tools. These applications are intended for all users of the Community Gateway.

Application Access

Request access to Community Gateway applications through Application Access.

Application Resources

Application Resources is a direct link to resources in the Clinical Integration Learning Center (CILC) that support Community Gateway applications, including how-to guides, training videos, FAQs, and other support documentation.

Clinical Integration Learning Center

The Clinical Integration Learning Center (CILC, pronounced “silk”) is the MSPPS Learning Management System that provides partners with access to e-learnings, registration for classroom-based trainings, as well as resources and documentation.

About Mount Sinai PPS, LLC

Mount Sinai Performing Provider System (MSPPS) is one of 25 PPSs in New York State participating in the Delivery System Reform Incentive Payment Program (DSRIP). As part of Medicaid reform, DSRIP aims to reduce avoidable hospital use by 25 percent by 2020. MSPPS partners with medical and behavioral health providers and community-based organizations throughout Manhattan, Brooklyn, and Queens to implement clinical initiatives that support the ultimate goal of DSRIP. For more information, visit www.mountsinaipps.org.

Partner Networks and Referrals

Connect with other healthcare providers in the MSPPS Network. These applications are intended for use by a wide variety of staff across organizations.

Community Resource Guide

Community Resource Guide enables care coordinators, social workers, and other care management professionals to quickly find and share the appropriate community and clinical resources in order to support patient needs.

Available to all partners.

Organizational Profile

The Organizational Profile application allows partners to view information about their organization, including contract details.

Available to all partners.

Care Team Communication

The Care Team Communication application allows a patient's care team to communicate and coordinate care in real-time through secure provider-to-provider messaging and clinical event notifications (e.g., notification of ED admissions).

Available to an initial set of partners.

PPS Questions

The DSRIP Command Center is a centralized resource to address administrative and care coordination needs for PPS partners. The DSRIP Command Center can be reached by phone (844-MSHS-4ME) or partners can submit a question electronically through the Community Gateway using the PPS Questions web form.

Available to all partners.

Manage Clinical Performance

Review and manage your organization's clinical performance. These applications are intended for clinical leadership and staff involved in organization quality and performance.

Analytics

Analytics provides analytics managers and clinical quality specialists with visual dashboards that can be used to evaluate organizational metrics, utilization, and performance.

Available to an initial set of partners.

About Mount Sinai PPS, LLC

Mount Sinai Performing Provider System (MSPPS) is one of 25 PPSs in New York State participating in the Delivery System Reform Incentive Payment Program (DSRIP). As part of Medicaid reform, DSRIP aims to reduce avoidable hospital use by 25 percent by 2020. MSPPS partners with medical and behavioral health providers and community-based organizations throughout Manhattan, Brooklyn, and Queens to implement clinical initiatives that support the ultimate goal of DSRIP. For more information, visit www.mountsinaipps.org.

Patient Information & Care Plans

Review comprehensive information about patients from in and out-of-network sources. These applications are intended for clinicians and care coordinators.

Healthix

Healthix is a Regional Health Information Organization (RHIO), which hosts partner and patient information. The platform includes data from a broad community of PPS organizations, enabling partners to connect and share bi-directionally.

Available to an initial set of contracted partners.

Mount Sinai HIE

The Mount Sinai Health Information Exchange (MS HIE) houses data for Mount Sinai Health System's (MSHS) patients. The MS HIE Clinical Viewer provides a comprehensive read-only view of patient information from various sources and allows providers to subscribe to clinical event notifications.

Available to an initial set of partners.

Patient 360

Patient 360 provides view-only access to longitudinal patient health data, pulled together from multiple sources. Designated users can search for and view patient data, including social determinants of health.

Available to an initial set of partners.

I-STOP

I-STOP is the Internet System for Tracking Over-Prescribing that can be used to monitor dispensed controlled substance prescription histories for patients.

Available to users who currently have access.

Claims

Manage claims and payment information. These applications are intended for user groups specified by the tool owner.

Healthfirst

Healthfirst Secure Services includes analytics dashboards that can be used to track utilization and performance measures.

Available to an initial set of partners.

MAPP

MAPP is the Medicaid Analytics Performance Portal that can be used to identify patients eligible for Health Home enrollment and has information to support Health Home care management activities.

Available to users who currently have access.
